On October 7, 2016, WikiLeaks released the first emails stolen from the Podesta email account. In total, WikiLeaks released 33 tranches of stolen emails between October 7, 2016 and November 7, 2016. The releases included private speeches given by Clinton;¹⁷⁷ internal communications between Podesta and other high-ranking members of the Clinton Campaign;¹⁷⁸ and correspondence related to the Clinton Foundation.¹⁷⁹ In total, WikiLeaks released over 50,000 documents stolen from Podesta's personal email account. The last-in-time email released from Podesta's account was dated March 21, 2016, two days after Podesta received a spearphishing email sent by the GRU.

d. WikiLeaks Statements Dissembling About the Source of Stolen Materials

As reports attributing the DNC and DCCC hacks to the Russian government emerged, WikiLeaks and Assange made several public statements apparently designed to obscure the source of the materials that WikiLeaks was releasing. The file-transfer evidence described above and other information uncovered during the investigation discredited WikiLeaks's claims about the source of material that it posted.

Beginning in the summer of 2016, Assange and WikiLeaks made a number of statements about Seth Rich, a former DNC staff member who was killed in July 2016. The statements about Rich implied falsely that he had been the source of the stolen DNC emails. On August 9, 2016, the @WikiLeaks Twitter account posted: "ANNOUNCE: WikiLeaks has decided to issue a US\$20k reward for information leading to conviction for the murder of DNC staffer Seth Rich."¹⁸⁰ Likewise, on August 25, 2016, Assange was asked in an interview, "Why are you so interested in Seth Rich's killer?" and responded, "We're very interested in anything that might be a threat to alleged Wikileaks sources." The interviewer responded to Assange's statement by commenting, "I know you don't want to reveal your source, but it certainly sounds like you're suggesting a man who leaked information to WikiLeaks was then murdered." Assange replied, "If there's someone who's potentially connected to our publication, and that person has been murdered in suspicious

circumstances, it doesn't necessarily mean that the two are connected. But it is a very serious matter...that type of allegation is very serious, as it's taken very seriously by us."¹⁸¹

After the U.S. intelligence community publicly announced its assessment that Russia was behind the hacking operation, Assange continued to deny that the Clinton materials released by WikiLeaks had come from Russian hacking. According to media reports, Assange told a U.S. congressman that the DNC hack was an "inside job," and purported to have "physical proof" that Russians did not give materials to Assange.¹⁸²

C. Additional GRU Cyber Operations

While releasing the stolen emails and documents through DCLeaks, Guccifer 2.0, and WikiLeaks, GRU officers continued to target and hack victims linked to the Democratic campaign and, eventually, to target entities responsible for election administration in several states.

1. Summer and Fall 2016 Operations Targeting Democrat-Linked Victims

On July 27, 2016, Unit 26165 targeted email accounts connected to candidate Clinton's personal office **PP**. Earlier that day, candidate Trump made public statements that included the following: "Russia, if you're listening, I hope you're able to find the 30,000 emails that are missing. I think you will probably be rewarded mightily by our press."¹⁸³ The "30,000 emails" were apparently a reference to emails described in media accounts as having been stored on a personal server that candidate Clinton had used while serving as Secretary of State.

Within approximately five hours of Trump's statement, GRU officers targeted for the first time Clinton's personal office. After candidate Trump's remarks, Unit 26165 created and sent malicious links targeting 15 email accounts at the domain **PP** including an email account belonging to Clinton aide **PP**. The investigation did not find evidence of earlier GRU attempts to compromise accounts hosted on this domain. It is unclear how the GRU was able to identify these email accounts, which were not public.¹⁸⁴

Unit 26165 officers also hacked into a DNC account hosted on a cloud-computing service **Personal Privacy**. On September 20, 2016, the GRU began to generate copies of the DNC data using **PP** function designed to allow users to produce backups of databases (referred to **PP** as "snapshots"). The GRU then stole those snapshots by moving
